Index of Editorial Reviewers

The editorial staff of *The American Journal of Human Genetics* would like to thank the following scientists for their invaluable assistance in reviewing manuscripts for the *Journal* from July 1, 1986 to June 30, 1987.

ALBERMAN, E.

Subject Index to Volume 41

(BC) = Brief Communication; (CR) = Committee Report;
(L) = Letter to the Editor

A-1 C-III A-IV gene region, restriction-fragment-length polymorphisms, and hypertriglyceridemia, 106
Abnormal kinetic behavior, cytochrome oxidase, in Leigh disease, 584
Abortion, spontaneous, and karyotype, 465
Achondroplasia, mortality, 454
Africa, southern, globin gene–associated restriction-fragment-length polymorphism, 1132
Age, and frequency of sperm chromosomal abnormalities, 484
Aldehyde dehydrogenase-2 locus, alleles, 996
Aldolase-A, -B, -C, and -pseudogene, 907
Alleles
  On aldehyde dehydrogenease-2 locus, 996
  *PRH*1 locus, coding for salivary-acidic proline-rich proteins, 1035
Allergies, in Tourette syndrome, 822
Alpha chain mRNA, absence in fibroblasts from patients of *pccA* complementation group, 1124
Alpha satellite, human X chromosome, molecular analysis of polymorphic domain, 391
Alpha$_1$-antitrypsin gene, association with restriction-site polymorphisms, 891
Alphoid DNA sequences, and characterization of centromeric regions, 374
American Society of Human Genetics, committee reports, 288 (CR)
Antigen(s), erythrocyte Gerbich blood group, 1117
Apolipoprotein(s)
  A-IV, polymorphism, 119
  Genetic studies, 119
Attention-deficit disorder, in Tourette syndrome, 701
Autosomal dominance, and recessivity, 689 (L)
Autosomal dominant locus, spinocerebellar ataxia, 524

Balanced inversion 8, transmission rate in Hispanic population of southwestern United States, 1083
β-Thalassemia, distribution of mutations in south China, 678
Blood group markers, linkage studies of Friedreich ataxia, 627
Bone marrow transplantation, 867
Books reviewed, author(s)/editor(s):
  Barakat, A. Y., 505
  Birbari, A. E., 505
  Dellarco, V. L., 318
  Der Kaloustian, V. M., 505
  Elkington, J., 509
  Epstein, C. J., 316
  Franceschini, G., 506
  Galas, D. J., 507
  Gatti, R. A., 79
  Hatcher, N., 81
  Hollaender, A., 318
  James, P. D., 80
  Kirkwood, T. B. L., 507
  Mansfield, P. K., 692
  Mufarrij, A. A., 505
  Nichols, A. V., 506
  Porter, I. H., 81
  Rosenberger, R. F., 507
  Sirtori, C. R., 506

Swift, M., 79
Voytek, P. E., 318
Willey, A. M., 81
Books reviewed, title:
Accuracy in Molecular Processes: Its Control and Relevance to Living Systems, 507
Aneuploidy: Etiology and Mechanisms, 318
Ataxia-Telangiectasia: Genetics, Neuropathology, and Immunology of a Degenerative Disease of Childhood, 79
Consequences of Chromosome Imbalance: Principles, Mechanisms, and Models, The, 316
Human Apolipoprotein Mutants—Impact on Atherosclerosis and Longevity, 506
Kidney in Genetic Disease, The, 505
Perinatal Genetics: Diagnosis and Treatment, 81
Poisoned Womb, The, 509
Pregnancy for Older Women, 692
Taste for Death, A, 80

Cancer, strategies for controlling, 63
cDNA clone, laminin-B1 chain, 605
Cell surface antigen, produced by gene on chromosome 3 (cen-q22), 1061
Centromeric regions, characterization by means of alphoid DNA sequences, 374
Chimerism, documentation following bone marrow transplantation, 867
China, β-thalassemia mutations, 678
Chromosomal abnormalities, sperm, and age, 484
Chromosomal analysis, semiautomated, 493
Chromosomal localization, statherin gene, 1048
Chromosome 2q31→2q37, 1
Chromosome 2q34-q37, placental and intestinal alkaline phosphatase genes, 1025
Chromosome 3 (cen-q22), cell surface antigen gene, 1061
Chromosome 4q11-q13, chromosomal localization of statherin gene, 1048
Chromosome 6, spinocerebellar ataxia autosomal dominant locus, 524
Chromosome 7C22 (*D7S16*), linkage with cystic fibrosis, 286 (L)
Chromosome 10, location of gene encoding vimentin, 616
Chromosome 11p, DNA sequences, loss in Wilms tumor, 202
Chromosome 12q12→12q13, 1
Chromosome 13, linked polymorphic markers, mapping Wilson disease locus to, 27
Chromosome 21, DNA sequences, isolation and mapping, 963
Chromosome Xp21, deletion, and Duchenne muscular dystrophy, 128
Clinical genetics services
Preview, 549
Time analysis, 559
Coagulation factors, vitamin K–dependent, congenital deficiency and Warfarin embryopathy phenotype, 566
Committee reports, American Society of Human Genetics, 288 (CR)
Compulsions, in Tourette syndrome, 782
Conduct, in Tourette syndrome, 742
Congenital deficiency, vitamin K–dependent coagulation factors, association with phenotype of Warfarin embryopathy, 566
Cord blood, karyotyping of neonates, 668
Coumarin derivatives, mechanisms of teratogenicity, 566

Cystic fibrosis
And cAMP-dependent protein kinase, 925
In Hutterite families, 1145
Linkage
DNA probe B79a (D7S13), 944 (BC)
7C22 (*D7S16*), 286 (L)
Cystinosis, heterozygote detection, 266
Cytochrome oxidase, abnormal kinetic behavior in Leigh disease, 584

Defective enzyme, Tay-Sachs disease with hexosaminidase A, 532
Deletion mutation, DXS164, familial inheritance, 138
Depression, in Tourette syndrome, 804
Disinhibition of limbic system, in Tourette syndrome, 839
DNA
Probe(s)
B79a (D7S13), linkage to cystic fibrosis, 944 (BC)
Studies of cystic fibrosis in Hutterite families, 1145
Restriction-fragment-length polymorphisms, haplotypes identified by, and hypertriglyceridemia, 106
Sequences
Chromosome 21, isolation and mapping, 963
Y chromosome, in Turner-syndrome mosaicism, 157
Duchenne muscular dystrophy, and deletion at Xp21, 128

Early development, in Tourette syndrome, 822
Emergenesis, genetical model, in memory of Laurence H. Snyder (In Memoriam), 517
Erythrocyte Gerbich blood group antigens, 1117

Familial correlations, maximum-likelihood estimation from multivariate quantitative data, 1104
Familial inheritance, DXS164 deletion mutation, 138
Febrile convulsions, segregation analysis, 249
Ferritin genes, 654
Fibrillar collagen genes, segregation in Marfan syndrome, 1071
Fibroblasts, patients of *pccA* complementation group, and absence of alpha chain mRNA, 1124
Fragile sites, sister chromatid exchanges at, 882
Friedreich ataxia, linkage studies, 627

Galactokinase deficiency, and thymidine kinase, 503 (L)
Gene frequencies, Sandhoff disease, and population screening for Tay-Sachs disease carriers, 16
Gene localization, laminin-B1 chain, 605
Genetic interrelationship, HLA-associated diseases, 331
Genetic mechanisms, loss of 11p DNA sequences in Wilms tumor, 202
Genetic risk, recombinant 8 syndrome, 1083
Genetic screening, effect on lethal recessive allele frequencies and homozygote incidence, 671
Genetics
Chance and morphogenesis, 979
Strategies for controlling cancer, 63
Genetics services, clinical
Preview, 549
Time analysis, 559
Globin gene–associated restriction-fragment-length polymorphisms, in southern African peoples, 1132
Globulin gene, thyroxin-binding, localization, 428

Glucocerebrosidase gene, initiator codons, 1016
Glycogen storage disease, type III, 1002
Glycogen-debranching enzyme, 1002
Glycosaminoglycan-free proteoglycan core protein, and syndrome resembling progeroid, 436

Handedness, in Tourette syndrome, 822
Haplotype(s)
  Analysis, in pedigrees, 356
  Association with β-thalassemia mutations in south China, 678
  HLA, marking for hemochromatosis gene, 89
  And hypertriglyceridemia, 106
Hemochromatosis gene, HLA haplotypes marking for, 89
Hemochromatosis-HLA association, 89
Hemopexin polymorphism, 645
Heterogeneity, etiological, in X-linked spastic paraplegia, 933
Heterozygote detection
  Of cystinosis, 266
  Sandhoff disease, for population screening for Tay-Sachs disease carriers, 16
Hexosaminidase A, and Tay-Sachs disease, 532
Hispanic population, southwestern United States, balanced inversion 8 transmission rate, 1083
HLA
  Haplotypes, marking for hemochromatosis gene, 89
  Tests of fit, 70 (BC)
HLA-associated diseases, genetic interrelationship, 331
HLA-A locus, mapping of hemochromatosis gene, 89
Homeo box–containing genes, human, at chromosomes 2q31→2q37 and 12q12→12q13, 1
Homozygote incidence, effect of genetic screening, 671
Human Genetics Education Section, 293
Huntington disease, racial variation, 168
Hutterite families, cystic fibrosis, 1145
Hypertriglyceridemia, and A-1 C-III A-IV gene region, 106

IgE, total serum (basal levels), inheritance, 51
Immunoblot analysis, type III glycogen storage disease, 1002
Inheritance
  Erythrocyte Gerbich group blood antigens, 1117
  Total serum IgE, 51
Initiator codons, glucocerebrosidase gene, 1016
Insulin receptors, normal and mutant, structural analysis, 402
Interchange, paternal X-Y, 594

Karyotype, and spontaneous abortion, 465
Karyotyping, cord blood, 668

Laminin-B1 chain, cDNA clone for, 605
Learning disorders, in Tourette syndrome, 701
Leigh disease, abnormal behavior of cytochrome oxidase, 584
Leprechaunism, and structural analysis of normal and mutant insulin receptors, 402
Limbic system, disinhibition, in Tourette syndrome, 839
Linkage
  Cystic fibrosis and 7C22 (*D7S16*), 286 (L)
  DNA probe B79a (D7S13) to cystic fibrosis, 944 (BC)
Linkage analysis, gene-centromere, in

families with trisomic offspring, 350
Linkage relationships, X-linked retinitis pigmentosa and short arm markers, 635
Linkage studies, Friedreich ataxia, 627
Linked polymorphic markers, mapping Wilson disease locus to, 27

Mania, in Tourette syndrome, 804
Mapping
  Chromosome 21 DNA sequences, 21, 963
  Hemochromatosis gene near HLA locus, 89
  Multipoint gene, using seriation
    General methods, 180
    Simulated and empirical mapping, 189
  Wilson disease locus, 27
Marfan syndrome, segregation of fibrillar collagen genes, 1071
Maximum-likelihood estimation, familial correlations from multivariate quantitative data, 1104
Molecular analysis, polymorphic domain of alpha satellite from human X chromosome, 391
Morphogenesis, genetics and chance, 979
Mortality, in achondroplasia, 454
Mosaicism, Turner-syndrome, Y chromosome–specific DNA sequences, 157
Multipoint gene mapping, using seriation
  General methods, 180
  Simulated and empirical, 189
Multivariate quantitative data, maximum-likelihood estimation of familial correlations, 1104
Mutation(s)
  β-Thalassemia, in south China, 678
  Spontaneous, and parental age, 218

Neonates, karyotyping, 668
Nephropathy, hereditary IgA, regionalization, 36
Neutrality tests, restriction-fragment-length polymorphisms, 948
Nondisjunction, maternal X-X, 594

Obituary: Laurence H. Snyder, 276, 517
Obsessions, in Tourette syndrome, 782
Orosomucoid structural locus, 418

Panic attacks, in Tourette syndrome, 761
Paternity, 77 (L)
pccA complementation group, absence of alpha chain mRNA in fibroblasts from, 1124
Pedigree(s)
  Analysis, sequential sampling, 687 (L)
  Haplotype analysis, 356
  Multivariate quantitative analysis, and maximum-likelihood estimation of familial correlations, 1104
Phenotype, Warfarin embryopathy, association with deficiency of vitamin K–dependent coagulation factors, 566
Phobias, in Tourette syndrome, 761

The Human Glucocerebrosidase Gene Has Two Functional ATG Initiator Codons
Joseph A. Sorge, Carol West, Wanda Kuhl, Lisa Treger, and Ernest Beutler 1016

Human Placental and Intestinal Alkaline Phosphatase Genes Map to 2q34-q37
Constance A. Griffin, Moyra Smith, Paula S. Henthorn, Harry Harris, Mitchell J. Weiss, Michael Raducha, and Beverly S. Emanuel 1025

Alleles at the *PRH*1 Locus Coding for the Human Salivary-Acidic Proline-Rich Proteins Pa, Db, and PIF
Edwin A. Azen, Hyung-Suk Kim, Patricia Goodman, Sheila Flynn, and Nobuyo Maeda 1035

cDNA Cloning and Chromosomal Localization (4q11-13) of a Gene for Statherin, a Regulator of Calcium in Saliva
Linda M. Sabatini, Leon R. Carlock, Grant W. Johnson, and Edwin A. Azen 1048

Identification of a Cell-Surface Antigen Produced by a Gene on Human Chromosome 3 (cen-q22) and Not Expressed by Rh_{null} Cells
Y. E. Miller, G. L. Daniels, C. Jones, and D. K. Palmer 1061

Segregation of All Four Major Fibrillar Collagen Genes in the Marfan Syndrome
D. J. Ogilvie, B. P. Wordsworth, L. M. Priestley, R. Dalgleish, J. Schmidtke, B. Zoll, and B. C. Sykes 1071

Genetic Risk for Recombinant 8 Syndrome and the Transmission Rate of Balanced Inversion 8 in the Hispanic Population of the Southwestern United States
A. C. M. Smith, K. Spuhler, T. M. Williams, T. McConnell, E. Sujansky, and A. Robinson 1083

Maximum-Likelihood Estimation of Familial Correlations from Multivariate Quantitative Data on Pedigrees: A General Method and Examples
D. C. Rao, George P. Vogler, M. McGue, and J. M. Russell 1104

Inheritance of Human-Erythrocyte Gerbich Blood Group Antigens
Marion E. Reid, Carolyn Sullivan, Maralice Taylor, and David J. Anstee ... 1117

Propionicacidemia: Absence of Alpha-Chain mRNA in Fibroblasts from Patients of the *pccA* Complementation Group
Anne-Marie Lamhonwah and Roy A. Gravel 1124

Globin Gene–associated Restriction-Fragment-Length Polymorphisms in Southern African Peoples
Michèle Ramsay and Trefor Jenkins 1132

Studies of Cystic Fibrosis in Hutterite Families by Using Linked DNA Probes
Carole Ober, Allan Bombard, Roopinder Dhaliwal, Sherman Elias, Jeanine Fagan, Thomas G. Laffler, Alice O. Martin, and Barbara Rosinsky .. 1145
